SP-2/SP-3	EXTREMELY HARD	19-20/MAXIMUM
RECOVERY	VERY LIGHT	7-12/90-120

Reprinted from March, 2013:

Last week I had the privilege of taking a team to the Senior Sectional meet in Federal Way, Washington (March 13-17). The highlight, for many of us, was watching last Summer's Olympic standout, **Missy Franklin** (Colorado Stars). Here's what I learned:

- **It's all about the cool-downs.** Missy cooled-down after every swim. She swam prelims and finals of 6 events, plus 4 relays: that means 16 races, 16 cool-downs. After her 100 backstroke final **she swam 25 minutes, continuously**; I know because I timed it! Despite the ever-present group of swimmers wishing for photographs and signatures, Missy stuck to her habits and cooled-down. That takes discipline. I surmise that Missy's cool-downs are probably longer than many swimmers' warm-ups.
- **Her starts: nothing fancy**; it even seemed that she entered the water rather quicker than she needed to, like she could have spent more time in the air before entering the denser water. **However**, once she entered the water her acceleration was noticeably quicker than any other swimmer. The probable reason for this was streamlining. **Missy kept her body (fingers, hands, arms, head, torso, legs, feet, toes) in a tighter and straighter streamline than any other swimmer.**
- **Her turns: quick and efficient.** Her push-offs were **horizontal**, fast, and she usually surfaced about a body-length past the flags. What was most amazing was her trajectory from the wall: **she pushed off horizontally** and reached the surface gradually. She appeared to swim (and turn) within an area not greater than 2 feet (i.e., from surface to 2-feet deep).
